(1) The page is available according to the enabled measurement.
(2) m^3 Gas, m^3 Water, kWh remote heating.
(3) Hot and Cold (water), GAS.
(4) The active tariff is displayed with an “A” before the “t1-t2-t3-t4” symbols.
(5) These pages are not available in case of Dupline system.
(6) Pages not available in case of 1-phase sysem (1P selection).
(7) Pages not available in case of 3-phase unbalanced system (3P selection).

Note: in case of alarm the whole display blinks. The blinking stops when either the selector or the joystick are used. The display starts to blink again after 60 seconds of the last command being used. There is a time-out of 60s that brings the scrolled page to the default one (selectable according to the table given above).

Measuring Inputs	-	4kV	4kV	4kV	4kV	0kV	4kV
Relay outputs	4kV	-	-	-	-	4kV	4kV
Open collector outputs	4kV	-	-	-	-	4kV	4kV
Comm. port and digital inputs	4kV	-	-	-	-	4kV	4kV

Self power supply	0kV	4kV	4kV	4kV	4kV	-	-
Aux. power supply	4kV	4kV	4kV	4kV	4kV	-	-

NOTE: all the models with auxiliary power supply have, mandatorily, to be connected to external current transformers because the isolation among the current inputs is just functional (100VAC).

Tamper proof accessory kit

The “tamper proof” kit is available with the “P” option (two screw protection covers).

The instrument can be sealed in three points:
- Upper cover;
- Lower cover;
- Front selector (to lock the instrument programming);
