Fuse 1000V FH-01-32L

Product Application

FH-01-32L series fuse holder is made of refractory material, and meets the standard of IEC60947-3. The maximum rated voltage is 1500V and the maximum current is 30A. As a short circuit and over-current protector, it is widely used in the high and low voltage distribution system, control system, and electrical equipments, like distribution box and inverter.

Product Benefits

- Din35 Rail Installation, Easy to Install
- Adjustable terminal block, Wiring firm
- Fire-retardant shell, high temperature resistance
- Flexible installation, Easy to replace

Fuse 1500V FH-15-32L

Product Application

It is a holder for fuse with protection function for short circuit protection and fault prevention of photovoltaic power line for rated voltage 1500VDC and meets the standards of International Electro technical Commission IEC60269.

Product Benefits

- It is can install and uninstall a fuse without tool.
- 35mm DIN rail mounting.
- Short-circuit indicator built-in.
