

NEC 690.2 阻流二極體 2011 年起不裝置

NEC 690.2 Blocking Diode

A diode used to block reverse flow of current into a photovoltaic source circuit.

-

Blocking diodes were used in place of overcurrent protective devices, but the 2011 will delete blocking diodes since all circuits must be overcurrent protected now.

NEC 690.2 阻流二極體

用於阻止電流反向流回光伏發電電路的二極體。

-

阻流二極體曾被用來替代過流保護設備，但是 2011 將去除阻流二極體，因為現在所有的電路本身都必須帶有過流保護裝置。
