

# Monitoring Relays

## True RMS 3-Phase, 3-Phase+N, 1-Phase, Multif. Type DPC02 B003

- TRMS 3-phase and 1-phase over and under voltage, over and under frequency monitoring relays
- 3-phase version with phase sequence and phase loss functions (detect when all 3 phases are present and have the correct sequence)
- According to ENEL DK 5950 (March 2002, ed. 1.1) (certified from TÜV laboratory)
- Suitable for applications according to ENEL DK 5940 (Aprile 2007, ed. 2.2)
- Detect if all the 3-phase-phase or phase-neutral voltages are within the set limits
- Detect if the system frequency is between the set limits
- Adjustable recovery delay (0.1 to 30 s)
- Output: 2 x 8 A SPDT relays
- For mounting on DIN-rail in accordance with DIN/EN 50 022
- 45 mm Euronorm housing
- LED indication for relays, alarm and power supply ON

### **Product Description**

3-phase (or 3-phase+neutral) and 1-phase line voltage monitoring relays for over and under voltage, over and under frequency with built-in time delay function. 3-phase version with phase sequence and phase loss functions. The main application is for sun generator sets.

## Mode of Operation

Connected to the 3 power supply, DPC72 B001 oper- ates when the frequency and the voltage of the mains are within the setpoints.	programming procedure. Every failure is detected through the DPDT output relay.

## Function/Range/Level/Time Setting

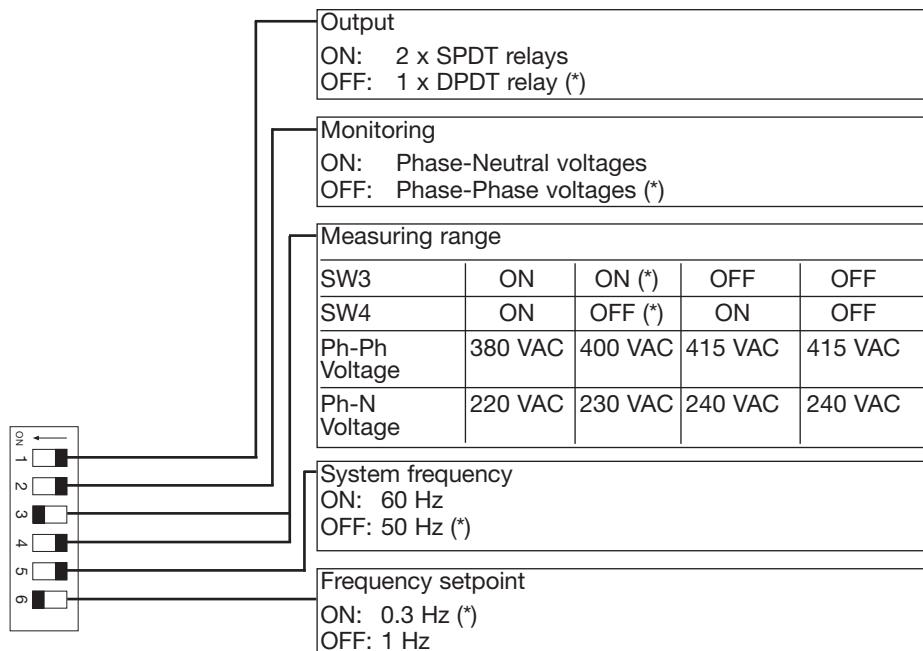

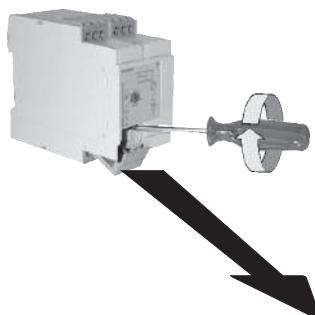

The DIP-switches are preset to submit to the DK 5940 ENEL regulation (Aprile 2007, ed.2.2). Other adjustments range are possible as shown below.

To access the DIP-switches open the plastic cover using a screwdriver as shown below.

MPC 02 D M23 B003 (1-Phase version)
