

Mentioned rating counts when two poles (+ -) are applied, If there are two negative poles intended to combine in one terminal deck, then the maximal allowable current (A) has to be respected.

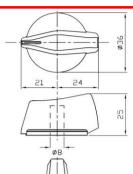

This means the maximal allowable current has to be split by 2 (with 2 poles combined).

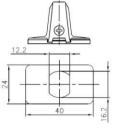

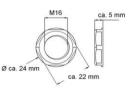

Technical data	Symbol	Ratings:	I	II	III	IV		V	Unit
Rated operational voltage	Ue		1000	850	800	650		400	V dc
Rated operational current	le		16	20	25	30		45	A dc
Required fine wire cross-se	ection (minimal)*:		2,5	4,0	4,0	6,0		10,0	mm²

Mounting instructions

In the application all ratings according to the datasheet have to be respected. After mounting, the wiring must be checked and the switch must operate smoothly. When building the switch in an enclosure, the space envelope must be respected according to the applicable standards.

Maintenance

The X type switches are designed for a very long life but it is advised to do some simple yearly maintenance.

- Check the installation for signs of overload or overheating. The terminals may not exceed the limit of 85oC under full load.
- By operating the switch a few times (5x) the contacts will clean themselves and the switch will have a longer life.

${\tt Connection}$

The terminals, can take copper wires up to 6 mm2.
The recommended Spade Tongue Terminals may have a maximum width of 9 mm (see table for recommendations)

- *1 16mm² only with fine stranded wire (or two times 6mm²)
- *2 Optional: A yellow finger safe sleeve for the Spade Tongue Terminal (Santon 52A1256.35) can be ordered under item number 52A1564.00

Relative humidity (max.), without condensation at 20°C
